PRISM Digital Signage

15.6" Touch Screen Display

Our 15.6" Touch Screen Display is designed to provide a highly interactive and engaging experience for users, making it an ideal solution for enhancing customer interactions. This vibrant, responsive touch screen allows customers to easily navigate through content, explore product options, and access information at their fingertips. By integrating this cutting-edge display, businesses can create a dynamic and immersive environment that not only captivates users but also boosts customer satisfaction and engagement through intuitive and seamless interactions.

PRISM Digital Signage

Sleek and Compact Design

Featuring a sleek and compact design, this display fits effortlessly on counters, making it the perfect choice for businesses looking to maximize their space without compromising on visual impact. Its modern and streamlined appearance ensures that it integrates seamlessly into any environment, from retail stores to hospitality settings. Despite its compact size, the display delivers stunning high-impact visuals that capture attention and engage customers, making it a powerful tool for promoting products, sharing information, and enhancing the overall user experience.

PRISM Digital Signage

Available with Long-Lasting Battery

This display is available with an optional built-in long-lasting battery, providing the flexibility and reliability needed for uninterrupted operation in any setting. Whether in high-traffic areas, temporary installations, or locations with inconsistent power supply, the robust battery option ensures that the display continues to perform seamlessly without the need for constant access to an electrical outlet. This feature is especially beneficial for businesses that require mobility or operate in environments where dependable power sources may be a challenge, allowing you to maintain continuous engagement and service excellence.

Android Operating System

This display operates on the latest Android Operating System, providing exceptional flexibility and compatibility with a vast array of apps and software solutions. By leveraging the widely adopted Android platform, users can easily integrate the display with their existing systems, customize their interface, and access a broad selection of applications tailored to their specific business needs. The intuitive and user-friendly Android OS not only simplifies operation but also opens up endless possibilities for enhancing functionality, making it an ideal choice for businesses looking to provide a dynamic and adaptable interactive experience.

PRISM Digital Signage

Dynamic Content Display

Our dynamic content display is the perfect tool for capturing attention and delivering engaging visual content in a variety of settings. Whether you're promoting new products, running eye-catching advertisements, showcasing digital menus, or providing interactive customer information, this display offers the versatility and impact you need. Its high-definition screen ensures crisp and vibrant visuals, making every piece of content stand out and resonate with your audience. Ideal for retail, hospitality, restaurants, and other environments, this display transforms how you communicate with customers, creating immersive and memorable experiences that drive results.

PRISM Digital Signage

Portable and Lightweight

Featuring a portable and lightweight design, this display is easy to move and position, making it an excellent choice for dynamic retail spaces. Its mobility allows businesses to effortlessly adjust the display's location to suit different layouts, promotional needs, or foot traffic patterns, enhancing flexibility and operational efficiency. Whether you need to showcase products in different areas of your store, create pop-up experiences, or adapt to seasonal displays, this display's convenient portability ensures that you can always position it exactly where it will have the most impact, maximizing visibility and engagement.

PRISM Digital Signage

High-Resolution Screen

Equipped with a high-resolution screen, this display ensures stunningly crisp and clear visuals that are designed to attract and hold customer attention. Every detail is rendered with exceptional clarity, making your content—from images and videos to text and graphics—truly stand out. This superior visual quality not only enhances the overall viewing experience but also plays a crucial role in effectively communicating your message and captivating your audience. Perfect for environments where high-impact visuals are key, the display's high-resolution screen is an essential feature for driving engagement and maximizing the impact of your digital content.

PRISM Digital Signage

Wi-Fi and Bluetooth Connectivity

Featuring built-in Wi-Fi and Bluetooth connectivity, this display offers seamless integration with other devices and networks, making content management easier and more efficient than ever. Whether you're updating promotions, synchronizing with other digital signage, or connecting to external devices, the versatile connectivity options provide the flexibility and convenience needed to keep your content fresh and relevant. Manage and deploy updates remotely, share information instantly, and ensure a smooth, interconnected experience that enhances your overall digital strategy.

Durable Build Quality

Crafted with robust materials and superior craftsmanship, this display is designed to withstand the demands of everyday use in busy environments. Its durable build quality ensures that it remains reliable and resilient, even in high-traffic areas like retail stores, restaurants, airports, and other bustling settings. Built to last, the display is engineered to resist wear and tear, making it a dependable solution for continuous operation. Whether it's constant interaction from customers or exposure to varying conditions, you can count on its sturdy construction to deliver consistent performance without compromising on appearance or functionality.

PRISM Digital Signage

Secure Anti-Theft Mechanism

Equipped with a secure anti-theft mechanism, this display features a robust locking system designed to prevent unauthorized removal and safeguard your investment. The integrated locking system ensures that the display remains firmly in place, providing peace of mind in high-traffic or public environments where security is a concern. This added layer of protection not only deters potential theft but also maintains the display's integrity and functionality, allowing you to focus on delivering exceptional content without worrying about unauthorized access or tampering. Ideal for locations requiring heightened security, this feature ensures the safety and longevity of your display.

PRISM Digital Signage

SOFTWARE TOP FEATURES

User-Friendly Content Management System (CMS)

Provides an intuitive interface for easy creation, scheduling, and management of digital content, allowing users to efficiently update and organize their displays.

Remote Content Management

Enables users to manage and update content remotely via web-based or cloud platforms, making it convenient to control multiple displays from a single location.

Real-Time Updates and Synchronization

Supports instant content updates and synchronization across multiple devices, ensuring all screens display the latest information simultaneously.

Multi-Zone Display Capability

Allows for the division of the screen into multiple zones, enabling the display of different types of content (e.g., video, images, text) simultaneously within one screen.

Interactive Touch Features

Includes touch-responsive software for interactive applications such as surveys, wayfinding, and product information, enhancing user engagement.

Scheduled Content Playback

Features a scheduling tool for setting specific times and dates for content playback, ensuring timely and relevant information is displayed according to user needs.

Content Templates and Widgets

Easily navigate complex spaces with EasyFind Pro's support for multiple buildings, floors, and both indoor and outdoor positioning, along with mobile transfer for seamless guidance.

Data Analytics and Reporting

Provides tools for tracking viewer interactions and analyzing content performance, helping users optimize their digital signage strategies based on real-time data.

Social Media Integration

Supports integration with social media platforms to display live feeds, posts, and updates directly on the signage, keeping content fresh and engaging.

Remote Troubleshooting and Support

Includes remote diagnostic tools for troubleshooting and resolving issues without needing on-site support, improving maintenance efficiency and reducing downtime.

PRISM Digital Signage

Advanced and Intuitive Content Management System (CMS)

Experience seamless control over your digital displays with our user-friendly Content Management System (CMS). Designed with an intuitive interface, it simplifies the process of creating, scheduling, and managing your digital content. Effortlessly update and organize your displays in real time, ensuring that your messaging remains relevant and impactful. Whether you need to promote new products, share announcements, or display dynamic content, our CMS offers a straightforward solution to efficiently keep your audience engaged and informed.

PRISM Digital Signage

Remote Content Management for Ultimate Convenience

Take full control of your digital displays from anywhere with our robust Remote Content Management feature. Using web-based or cloud platforms, you can easily manage and update content across multiple screens, all from a single location. This powerful capability allows you to efficiently make changes in real-time, schedule new content, and maintain a consistent brand message across various sites. Perfect for businesses with multiple locations or large-scale digital networks, our remote management tools provide the flexibility and convenience needed to keep your content fresh and engaging at all times.

PRISM Digital Signage

Real-Time Updates and Seamless Synchronization

Keep your digital signage up-to-date and synchronized with our real-time content update feature. Instantly push new content or make changes across multiple devices, ensuring that all screens display the most current information at the same time. Whether you're announcing promotions, updating schedules, or sharing important news, our system guarantees that your audience receives consistent and timely messaging across all displays. This powerful capability enhances engagement and maintains a unified brand presence, no matter how many screens you're managing.

Dynamic Multi-Zone Display Capability

Maximize the impact of your digital signage with our versatile Multi-Zone Display feature. This capability allows you to divide the screen into multiple sections, each dedicated to displaying different types of content, such as videos, images, text, and more—all at the same time. Effortlessly create engaging and dynamic displays that capture attention by combining various media formats within a single screen. Perfect for delivering complex messages or promoting multiple products and services simultaneously, this feature ensures your content remains visually appealing and effective in communicating with your audience.

PRISM Digital Signage

Interactive Touch Features for Enhanced Engagement

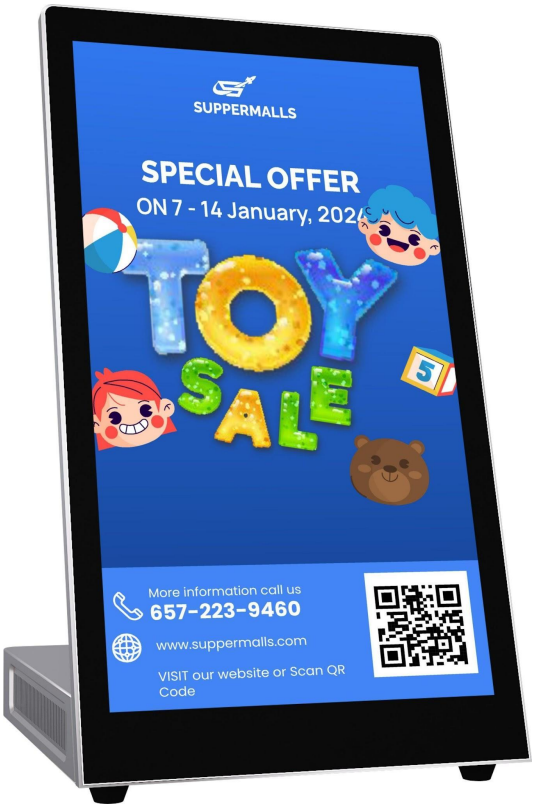
Elevate your digital signage with our Interactive Touch Features, designed to create engaging and immersive user experiences. Our touch-responsive software enables a range of interactive applications, including surveys, wayfinding, and detailed product information. By allowing users to interact directly with your displays, you not only enhance their engagement but also provide a more personalized and informative experience. This feature is perfect for creating interactive kiosks, engaging retail displays, and informative public directories, transforming passive viewing into active participation and making your digital signage a powerful tool for communication and interaction.

PRISM Digital Signage

Scheduled Content Playback for Timely Messaging

Ensure your digital signage always displays the right message at the right time with our Scheduled Content Playback feature. This powerful scheduling tool allows you to pre-set specific times and dates for content to be played, guaranteeing that your audience sees timely and relevant information when it matters most. Whether you're planning daily promotions, special announcements, or seasonal campaigns, you can easily manage and automate content delivery to match your marketing strategies or operational needs, enhancing both engagement and effectiveness across all your displays.

PRISM Digital Signage



Content Templates and Customizable Widgets for Effortless Design

Simplify your content creation process with our library of pre-designed templates and customizable widgets. Whether you're creating promotional messages, event announcements, or informational displays, these professionally crafted templates and dynamic widgets allow you to design stunning, eye-catching content with ease. Tailor each template to fit your brand's style, adjust layouts, and add engaging elements to create displays that captivate your audience. This feature streamlines the design process, saving time while ensuring your digital signage always looks polished and professional.

PRISM Digital Signage

Comprehensive Data Analytics and Reporting Tools

Unlock the full potential of your digital signage with our advanced Data Analytics and Reporting tools. Track viewer interactions and monitor content performance in real time to gain valuable insights into how your audience engages with your displays. Use these data-driven insights to refine your digital signage strategies, improve content effectiveness, and maximize engagement. With detailed reports on viewer behavior and content impact, you can make informed decisions to optimize your messaging, ensuring it resonates with your target audience and drives better results for your business.

Seamless Social Media Integration for Dynamic Content

Keep your digital displays vibrant and engaging with our Social Media Integration feature. Effortlessly connect with popular social media platforms to stream live feeds, posts, and updates directly on your signage. This capability allows you to showcase real-time content, such as customer reviews, trending topics, and brand announcements, ensuring your displays remain current and interactive. By incorporating social media content, you can increase audience engagement, enhance brand visibility, and create a dynamic experience that captures attention and keeps viewers coming back for more.

PRISM Digital Signage

Remote Troubleshooting and Support

Ensure your digital signage operates smoothly with our Remote Troubleshooting and Support capabilities. Equipped with advanced remote diagnostic tools, this feature allows for quick identification and resolution of issues without the need for on-site assistance. By enabling technicians to address problems from anywhere, you can significantly improve maintenance efficiency, minimize downtime, and reduce costs associated with in-person visits. This proactive approach to support keeps your displays running seamlessly, ensuring that your messaging is uninterrupted and always available to your audience.

PRISM Digital Signage

Quick Access with Shortcuts and Frequent Locations

Optimize user convenience with our Quick Access feature, designed to provide seamless navigation to frequently visited locations. This feature enables users to quickly access popular destinations through intuitive shortcuts and a list of Frequently Accessed Locations. With just a tap, users can effortlessly navigate to the spots they visit most often, significantly reducing navigation time and enhancing their overall experience. By streamlining the process of reaching key areas, this feature ensures that users can move efficiently and comfortably, making their interactions with the system both quicker and more satisfying. Perfect for any setting where time and convenience are essential, our Quick Access feature is a valuable tool for enhancing user engagement and satisfaction.
