Reliable Connectivity with Built-in Wi-Fi Antenna

Experience the freedom of consistent, high-speed internet access with an integrated Wi-Fi antenna designed for stability and enhanced performance. This powerful antenna ensures that your digital signage operates seamlessly, enabling uninterrupted updates, streaming, and remote access to deliver content efficiently and in real-time.

Secure and Easy Wall Installation with VESA Standard Mount

Our signage includes a VESA Standard Mount, allowing for secure, simple, and streamlined wall installation. The universal design offers compatibility with multiple mounting solutions, making it easier to integrate into various environments with safety and stability assured.

Customizable System with Optional Removable PC or Android

Choose between a removable PC or Android system for optimal performance and easy future upgrades. This flexible option lets you customize your signage setup based on specific needs, whether you require the processing power of Windows or the versatility of Android, ensuring adaptability for evolving business requirements.

Immersive Sound with Built-in Dual 8W Speakers

Deliver clear, dynamic audio with our high-quality built-in speakers, each rated at 8 watts, which eliminate the need for external speakers. Perfect for multimedia presentations, announcements, and promotional content, these speakers enhance the audiovisual experience by ensuring that your messages are heard clearly.

Easily Accessible USB Ports for Device Connectivity

Our wall-mountable digital signage features strategically placed USB ports, offering fast charging and connectivity for peripheral devices. Designed with convenience in mind, these ports make it easy to connect external devices or charge on-the-go, providing a user-friendly experience that adapts to various interactive applications and configurations.

Ultra-Slim, Modern Profile to Complement Any Space

Designed to blend seamlessly with any interior, our signage features an ultra-slim profile that combines style and performance. This sleek design maximizes the aesthetic appeal of your environment while providing a highly functional and space-saving digital solution.

Enhanced Performance with Optional Removable PC – Microsoft Windows 10 Pro

For those requiring extra power, opt for a removable PC equipped with Windows 10 Pro, an Intel i5 processor, 8GB RAM, and a 128GB SSD, giving you robust performance with the flexibility of easy upgrades. Additionally, an Android player option is available for a versatile approach to your interactive applications.

Unobstructed Viewing with a Wide Angle Display

Enjoy exceptional visibility from virtually any angle with our advanced wide-view display, featuring viewing angles of 165° horizontally and 150° vertically. This ensures that everyone in the room can see your content clearly, whether they are seated directly in front or off to the side, making it ideal for collaborative spaces and group presentations.

Interactive Touch Features for Engaging User Experiences

Our signage includes touch-responsive software that empowers users to interact directly with the screen. Whether for taking surveys, navigating wayfinding systems, or accessing product information, these features invite users to engage actively, creating memorable and interactive experiences.
