HARDWARE TOP FEATURES

HARDWARE TOP FEATURES

43-inch Full HD Display

The 43-inch Full HD screen delivers crisp, crystal-clear visuals, ensuring that your digital content grabs the attention of your audience.

Customizable Content

Remotely upload and manage promotional content with ease.

Cordless Design

Say goodbye to messy cables with the innovative cordless design. Powered by a long-lasting internal battery, this digital signage solution allows for neat and clutter-free displays in any environment.

Durable A-Board Structure

Built with a robust A-board frame, this signage solution is made to withstand regular movement and outdoor usage.

Lightweight Build

Despite its durability, this digital signage is lightweight and easy to handle.

On-Wheels Mobility

Designed with mobility in mind, this unit is equipped with smooth-rolling wheels, making it effortless to transport between different locations, whether indoors or outdoors.

Wi-Fi & 4G Connectivity

Stay connected at all times with integrated Wi-Fi and 4G capabilities.

Weather-Resistant

Specifically engineered for outdoor use, this mobile A-board digital signage is built to endure varying weather conditions.

Long Battery Life

With a high-capacity battery, this digital signage can provide hours of uninterrupted display time.

PRISM | Hardware Brochure

43-inch Full HD Display

Featuring a large 43-inch Full HD screen, this display is designed to present your content with outstanding sharpness and clarity. The high resolution ensures that images, videos, and text are vividly rendered, delivering a visually captivating experience. Whether it's being used for advertisements, wayfinding, or event schedules, this display quality will effectively capture and hold the attention of viewers, making sure your message stands out.

Cordless Design

The cordless design is an ideal solution for locations that require flexibility without the limitations of traditional power sources. Powered by an internal, long-lasting battery, this unit eliminates the need for unsightly cables, giving your display a clean and professional look. This setup is perfect for dynamic spaces such as event venues, retail stores, or outdoor promotions where power sources may be limited or unavailable.

Durable A-Board Structure

Built with a rugged A-board frame, this signage is designed to handle the demands of high-traffic environments. The durable construction provides a stable base, keeping the unit secure even in busy areas. This structure is particularly beneficial for businesses that require frequent relocation of displays, as it maintains both durability and a polished appearance, enhancing the overall impression it creates in any space.

On-Wheels Mobility

Designed with easy mobility in mind, this signage solution features a stable, on-wheels design that allows users to effortlessly transport it between locations. Move the unit from one side of a venue to another, shift it between indoor and outdoor spaces, or reposition it for maximum visibility based on foot traffic flow—all without lifting heavy equipment or needing multiple setups.

Long Battery Life

Equipped with a high-capacity battery, this signage solution provides hours of continuous operation, eliminating the need for frequent recharging. Perfect for events, outdoor settings, and other situations where power access might be limited, the extended battery life allows you to maintain uninterrupted displays for extended periods. This reliability means you can focus on engaging your audience without concerns over power limitations.

Weather-Resistant

Specifically crafted to withstand a variety of environmental conditions, this signage unit is protected against rain, wind, and sunlight. This weather-resistant design keeps the unit operating reliably, ensuring your content is always on display without interruptions, even in outdoor settings. For businesses relying on consistent messaging regardless of location, this durability offers a significant advantage.

Wi-Fi & 4G Connectivity

With integrated Wi-Fi and 4G connectivity, this signage solution enables real-time, remote content management, allowing you to update displays instantly. Whether you need to share new promotions, alter event information, or adjust your messaging on the fly, this connectivity ensures a seamless flow of updated content, maximizing the impact of your display.

Lightweight Build

Despite its strength, the lightweight build of this signage solution makes it exceptionally portable. The streamlined construction allows users to reposition it frequently with ease, making it ideal for scenarios where flexibility is essential. This blend of portability and durability ensures that you can adapt your signage setup quickly and efficiently, no matter where or how often it's needed.
