## High Brightness Ambiance Sensor

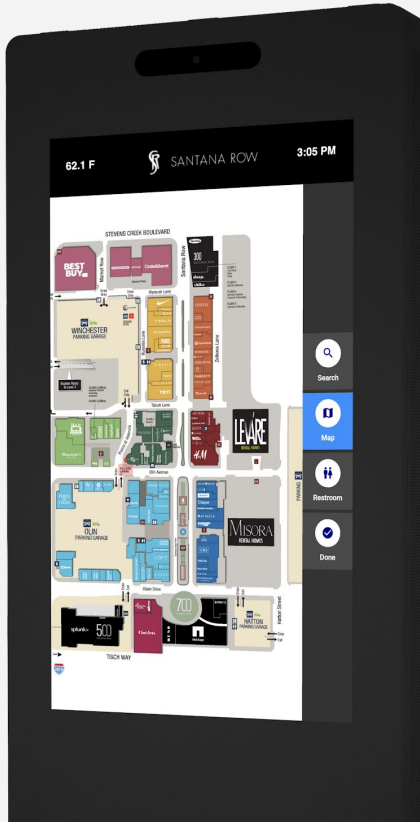

The Outdoor Touch Screen Display V8 Series features a high brightness ambiance sensor, ensuring excellent screen visibility in all lighting conditions, from direct sunlight to low-light environments. The sensor automatically adjusts the screen's brightness levels based on ambient light, delivering a consistently clear and vibrant display while also optimizing power consumption. This advanced feature enhances user experience and ensures your content remains engaging and readable, no matter the time of day or weather conditions, making it ideal for outdoor digital signage, advertising, and interactive displays.

## **High-brightness 3500-4000 nits Sunlight Read Display**

The Outdoor Touch Screen Display V8 Series is equipped with a high-brightness display ranging from 3500 to 4000 nits, specifically engineered to deliver exceptional visibility even under direct sunlight. This ultra-bright screen maintains vibrant colors, sharp contrasts, and clear readability, ensuring that your content stands out in any outdoor setting. Ideal for public spaces, storefronts, and high-traffic areas, this sunlight-readable display guarantees that your messaging remains impactful and accessible to viewers, regardless of the weather or time of day.

## Advanced Lamination Glass, Maximum UV Filter

The Outdoor Touch Screen Display V8 Series incorporates advanced lamination glass with a maximum UV filter, providing superior protection and clarity for outdoor use. This specialized glass reduces glare, enhances screen visibility, and shields the display from harmful UV rays, preventing screen degradation and color fading over time. The lamination process also increases the glass's durability, making it resistant to impacts and scratches. This feature ensures long-lasting performance and a clear, crisp display in all weather conditions, making it ideal for high-traffic outdoor environments.

## PCAP/Capacitive Touch Screen

The Outdoor Touch Screen Display V8 Series is equipped with a PCAP (Projected Capacitive) touch screen, renowned for its precise and responsive multi-touch capabilities. This technology supports gestures such as pinching, zooming, and swiping, providing users with a smooth and intuitive interaction. The capacitive touch screen is highly durable, designed to function reliably even through glass or with gloves, making it perfect for all-weather outdoor environments. Its responsive nature enhances user engagement, making it ideal for applications like self-service kiosks, interactive wayfinding, and digital advertising.

## Front Opening For Easy Maintenance

The Outdoor Touch Screen Display V8 Series features a front-opening design that allows for quick and easy maintenance, minimizing downtime and service disruptions. This user-friendly access design enables technicians to reach internal components without the need to dismount the display, simplifying routine maintenance and repairs. Whether it's cleaning, replacing parts, or performing updates, the front-opening mechanism streamlines the service process, saving time and reducing operational costs. This feature ensures that your display remains in optimal working condition with minimal effort, making it ideal for busy outdoor environments.

## Easy and Secure Mounting Base

The Outdoor Touch Screen Display V8 Series comes with an easy and secure mounting base that simplifies installation while ensuring the display remains stable and safe in outdoor settings. The mounting base is engineered for quick setup, allowing for efficient deployment in a wide range of locations, from sidewalks to shopping centers. Its robust construction provides enhanced security, protecting against tampering and adverse weather conditions. This feature guarantees that the display stays firmly in place, providing reliable performance and peace of mind, whether in high-traffic areas or exposed environments.

## Optional Removable PC Microsoft Windows 10 Pro

Offers an optional removable PC, providing powerful computing capabilities with a choice of operating systems. Equipped with Microsoft Windows 10 Pro, an Intel i5 processor, 8GB RAM, and a 128GB SSD, this option ensures smooth and reliable performance for demanding applications. The removable PC design allows for easy upgrades and maintenance, enhancing the overall flexibility and longevity of the display. For additional versatility, an Android player is also available, catering to different software requirements and use cases. This feature makes the V8 Series an adaptable solution for a wide range of outdoor digital signage and interactive applications.

## Audio Speakers

The Outdoor Touch Screen Display V8 Series includes built-in audio speakers designed to provide clear and impactful sound, enhancing the overall user experience. These speakers are ideal for applications that require audio output, such as promotional videos, interactive guides, or public announcements. The speakers are engineered to deliver high-quality sound even in outdoor environments, ensuring that audio content is heard clearly amidst ambient noise. This feature adds an extra dimension to your digital signage, making it more engaging and effective for communicating your message.

## High Res. Camera (optional)

This camera delivers crisp, detailed visuals, making it ideal for applications such as live streaming, facial recognition, or interactive digital experiences. Its high resolution ensures clear and accurate image quality, enhancing the effectiveness of multimedia content and user interactions. The optional camera can be seamlessly integrated into the display, offering flexibility to meet various business needs, from customer engagement to security monitoring.
