User-Friendly Interface

Our Self Order Kiosk boasts an intuitive and easy-to-navigate interface, meticulously designed to facilitate quick and seamless transactions. The user-friendly layout ensures that customers of all tech-savviness levels can effortlessly navigate through the ordering process. With clear prompts and a streamlined design, users can swiftly select their items, customize their orders, and complete their transactions without any confusion or delay. This simplicity not only enhances the customer experience but also reduces wait times, making it an ideal solution for high-traffic environments. The interface is crafted to deliver a smooth, efficient ordering journey, ensuring that every interaction is as effortless as possible.

Comprehensive Reporting & Analytics

Our Self Order Kiosk is equipped with a robust reporting system designed to deliver detailed insights into various aspects of your business. This comprehensive reporting and analytics feature provides a wealth of information, including sales performance, customer behavior patterns, and transaction trends. With access to real-time and historical data, you can monitor key metrics, track sales trends, and understand customer preferences with precision. The system's advanced analytics capabilities enable you to generate customizable reports and visualize data through intuitive dashboards. This empowers you to make informed decisions, optimize operations, and identify growth opportunities, all while ensuring you have the actionable intelligence needed to drive your business forward.

PRISM *Digital Signage*

Unlimited Menu Configuration

Our Self Order Kiosk offers unparalleled flexibility with its unlimited menu configuration capabilities. This feature allows you to create and manage an unlimited number of menu groups and sub-groups, making it easy to organize and display your offerings according to any business size or type. You can effortlessly add and categorize an extensive array of ingredients and products, ensuring that your menu is as detailed and diverse as needed. Additionally, the system supports the inclusion of product images, allowing you to enhance your menu with visual appeal and provide customers with a clearer view of their choices. Whether you're running a large-scale operation with numerous offerings or a smaller establishment with specialized items, this feature adapts to your needs, providing a seamless and comprehensive solution for menu management.

PRISM *Digital Signage*

Brand Customization

Enhance your brand's presence and create a seamless, cohesive customer experience with our extensive brand customization options. Our platform allows you to personalize every aspect of the kiosk interface, from incorporating your logo and selecting brand-specific colors to customizing UI elements that reflect your brand's identity. This ensures that every interaction with your kiosk reinforces your brand image, delivering a consistent and professional appearance across all touchpoints.

Pre-Loaded Sample Data

Our Self Order Kiosk system is designed for a smooth and efficient setup process with the inclusion of pre-loaded sample data. This feature provides you with a ready-made set of example information, including sample menu items, product categories, and configurations, which allows you to quickly set up and demonstrate the system. The pre-loaded data serves as a practical starting point, enabling you to get the kiosk up and running right away without the need for extensive initial data entry. This functionality not only simplifies the setup process but also provides a clear view of how the system operates in a real-world scenario, making it easier to tailor the system to your specific needs.

Combo Creation Tool

Our Self Order Kiosk system features a versatile Combo Creation Tool designed to enhance customer engagement and drive sales. This powerful tool allows you to build and manage custom combo deals effortlessly. You can create attractive offers by bundling products together, encouraging customers to purchase more and enjoy greater value. The Combo Creation Tool supports various configurations, including meal deals, value packs, and promotional bundles, providing flexibility to tailor deals to your business needs. By leveraging this tool, you can optimize your product offerings, boost average transaction value, and increase overall customer satisfaction through enticing and well-structured combo deals.

Multiple Payment Options

Our Self Order Kiosk system supports a wide range of payment methods to ensure a convenient and flexible checkout experience for all customers. The system is equipped to handle various payment options, including mobile checkout, debit cards, tap-and-pay solutions, Apple Pay, Google Pay, and other digital payment methods. This comprehensive payment support allows customers to choose their preferred payment method, enhancing their overall convenience and satisfaction. By accommodating a broad spectrum of payment options, the kiosk system ensures a seamless and efficient transaction process, catering to diverse customer preferences and modern payment trends.

Promotion & Discount Module

Our Promotion & Discount Module empowers you to create and manage fully customizable promotions to drive sales and engage customers. Whether you're running week-long specials, happy hour deals, or seasonal discounts, this module provides the flexibility to design and implement a variety of promotional strategies. You can easily set up time-based offers, discount percentages, and special deals tailored to your business needs. With the ability to schedule and automate promotions, you can ensure timely and effective campaigns that attract customers and boost revenue. This robust module helps you optimize your marketing efforts and enhance the overall shopping experience for your clientele.

Advanced Upsell Features

Our Advanced Upsell Features are designed to intelligently increase your average order value by providing timely and relevant upsell suggestions. As customers make their selections, the system dynamically offers complementary products and enhancements that align with their choices. These targeted recommendations are based on customer preferences and purchase history, ensuring that each upsell opportunity is meaningful and appealing. By seamlessly integrating these upsell prompts into the ordering process, you can effectively boost sales and enhance the customer experience, all while making it easy for customers to discover and add additional items to their order.

Customer Feedback Integration

Our Customer Feedback Integration feature empowers you to gather valuable insights directly from your kiosk. With this built-in system, you can easily collect feedback from customers right at the point of interaction. This feature enables you to capture real-time opinions, suggestions, and ratings, allowing you to understand customer experiences and make informed improvements. By integrating feedback collection into your kiosk system, you streamline the process of acquiring customer insights, which helps enhance service quality, address concerns promptly, and continually refine your offerings to better meet customer expectations.

Integrated Coupon System with QR Codes

Elevate your promotional efforts with our Integrated Coupon System, featuring advanced QR code capabilities. This powerful tool allows you to create and manage a variety of coupon offers with ease, leveraging QR codes to streamline the redemption process. Customers can simply scan the QR codes to apply discounts, access special deals, or unlock exclusive promotions, making the coupon experience both convenient and efficient. With flexible discount options and straightforward management, you can enhance customer engagement, drive repeat business, and track the effectiveness of your promotional campaigns effortlessly.

PRISM Digital Signage

Digital Signage Suite

Our Digital Signage Suite empowers you to design and deploy compelling digital posters and content across multiple displays with ease. Whether you're showcasing vibrant image banners or engaging video ads, you can manage and update your digital signage directly from the user interface. The suite offers robust scheduling capabilities, allowing you to plan and execute advertising campaigns with full control over timing and display settings. This feature ensures that your messaging is consistently fresh and strategically timed, maximizing your impact and reach across various digital platforms.

Remote Management & Updates

Our Remote Management & Updates feature allows you to efficiently manage and update your kiosks from a distance, minimizing operational downtime. This functionality ensures that your kiosks are always equipped with the latest features, security patches, and performance enhancements without the need for on-site visits. Through a centralized management system, you can seamlessly push updates, monitor system health, and make adjustments as needed, all from one convenient location. This capability not only streamlines maintenance but also ensures that your kiosks remain up-to-date and secure, providing a smooth and uninterrupted user experience.

PRISM *Digital Signage*

Comprehensive Multi-Language Support for a Global Audience

Enhance accessibility and inclusivity with our Multi-Language Support feature, designed to cater to a diverse customer base. Our system offers a fully customizable multi-language interface, allowing you to provide a seamless and personalized experience for users across different languages. By supporting a wide range of languages, you ensure that all customers can navigate the kiosk effortlessly, understand product information, and complete transactions with ease. This feature not only improves user satisfaction but also broadens your market reach and supports a more inclusive environment for all visitors.
